Education

Bachelor of Science in Information Technology

2021 – 2025

Cavite State University – Imus Campus

Focused on programming (Java, C++, C#, JavaScript, Node.js), web development, troubleshooting, and basic network configuration including IP setup, while actively involved in student organizations.

Multimedia and Information Technology

2015 – 2017

Datacom Institute of Computer Technology

Focused on software development using VB.NET, C++, C#, and Java, combined with practical experience in hardware troubleshooting, system diagnostics, and Windows/Linux administration.

Experience

Sales Marketing Associate & Technician

July 2025 – Dec. 2025

Tekkie Computer Center Inc. | Bacoor City, Cavite

Assisted 30+ customers daily with hardware consultations, contributing to consistent monthly sales targets and providing personalized recommendations based on their specifications and budget. Supported technicians during peak periods with PC assembly and hardware setup while contributing to monthly sales targets through effective communication and strong product knowledge.

IT Internship

Mar 2025 – May 2025

Cypress Consultation and Solutions Technologies, Inc. | BGC, Quezon City, Manila

Installed LAN cabling, configured network switches, and performed basic network troubleshooting while setting up workstation connectivity from the data center to end-users using structured cabling standards. Gained hands-on experience in IT infrastructure, hardware installation, and technical support. Conducted LAN troubleshooting reducing workstation connectivity issues by 25%.

Shift Leader / Regular

May 2018 – July 2019

Alfametro Marketing Inc. | Imus City, Cavite

Supervised daily retail operations, ensuring excellent customer service while managing cash handling, sales tracking, and inventory reconciliation. Coordinated with area managers on sales performance and operational concerns, and trained new team members to improve overall shift efficiency.

Production Engineer

Aug 2017 – Feb 2018

EMI Yazaki Inc. | Imus City, Cavite

Executed preventive maintenance and corrective repairs on industrial equipment, reducing downtime by 30%. Conducted on-site mechanical and electrical diagnostics and maintained detailed maintenance logs for compliance and operational tracking.

PROJECTS

Jhigimoto Motorcycle and Accessories Web App with 3D Viewer

Designed and deployed a 3D-enabled e-commerce web application integrating Three.js, PHP, and MySQL, improving interactive product visualization and backend inventory tracking. Allowing users to interactively inspect motorcycle parts. Implemented inventory tracking and product management functionalities using PHP and MySQL, utilizing HTML, CSS, Node.js, and Bootstrap for frontend and backend integration.

Blitz Computer E-Commerce Website

Built a full-stack e-commerce platform with inventory and sales tracking, user authentication, product catalog, and checkout system. Implemented secure login and session management using PHP and MySQL, developed with HTML, CSS, Node.js, and Bootstrap.

Language

- English and Tagalog
